EDUCATION

Binghamton University, State University of New York

August 2023 - Present

Master of Science in Computer Science

GPA: 3.4/4

Coursework: Data Structures and Algorithms, Programming Languages, Database Management System, Social Media Data-Science Pipeline

Koneru Lakshmaiah Education Foundation

July 2018 – April 2022

Bachelor of Technology in Computer Science

GPA: 8.47/10.00

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript

Web Technologies: HTML5, CSS3

Frameworks: Spring Boot, Boot Strap, Selenium

Databases: SQL, MongoDB

Software and OS: Eclipse, Visual Studio Code, Jupyter Notebook, Git, Linux

Additional: Data Structure & Algorithm Design, Data Analysis, Junit, Agile, STLC, Regression Testing, Module Based Testing

EXPERIENCE

ValueLabs

SDET Intern

December 2021 – March 2022

- Actively participated in all QA and testing activities along with smoke, functional, and regression testing during the SIT phase.
- Prepared test cases, conducted tests, and reviewed test data within designated timeframes.
- Developed innovative test solutions by analyzing requirements and implementing data usage and validation.
- Employed Selenium element locators and Java to develop test suites, performing end-to-end testing, which led to achieving 99% test coverage and a 30% reduction in production defects.
- Improved system performance by identifying, documenting and reporting bugs and other issues.
- Created a performance reporting document ensuring 100% compliance with standards.

Avishkar Tech Solutions

AI & DS Internship

May 2020 – August 2020

- Gained a comprehensive understanding of project management principles and practical application.
- Developed a strong foundational knowledge of machine learning algorithms, including the evaluation of existing models and hands-on implementation of sample models.
- Assessed customer needs and proposed minimal adjustments to enhance overall satisfaction.

PROJECT EXPERIENCE

Recession Analytics Dashboard, Group Project

- Developed an analytics dashboard for current trends on recession that involves discussions from reddit, YouTube, 4chan, and unified into a single dashboard that helps in tracking the current trend.

Bank Application, Independent Project

- Developed a fully functional banking application with a user-friendly interface for account registration, login, and various banking operations using Java programming and Spring framework.
- Implemented robust security features, including email verification and OTP validation.
- Designed and structured the application to ensure data integrity and user privacy.

Blood Donation Management System, Independent Project

- Implemented SQL to build a database to store information about medical patients which helps to track blood donors and receivers and, orders made or requested for the type of blood needed.

CERTIFICATION

- Microsoft Azure Developer Associate
- Software IoT, IEEE BLP by MeitY
